20+

concurrent enterprise workstreams /
quarter

200M+

annual SMS/MMS + email sends
supported

30%

fewer late-stage scope changes

20%

shorter UAT-to-launch cycles

PROFILE

Client-facing technical project and program delivery lead with 7+ years across enterprise CRM, lifecycle marketing, customer data, MarTech and integrated digital programs. I turn ambiguous business and customer goals into clear delivery paths across scope, architecture, engineering, data, QA, launch, adoption and optimization. Strongest when systems cross ownership boundaries and the team needs a recommendation, explicit trade-offs and end-to-end proof.

EXPERIENCE

Vigorate - Account Manager | Technical Project & Program Delivery Lead, CRM & MarTech

Sep 2021 - Present | Toronto, Canada

- Own end-to-end delivery across 20+ concurrent enterprise CRM, customer-data, lifecycle and MarTech workstreams each quarter, balancing production releases with roadmap, optimization and platform-improvement work.
- Lead lifecycle and customer-engagement programs supporting 200M+ annual SMS/MMS and email sends across segmentation, targeting, journey logic, automation, data validation, QA, reporting and optimization.
- Translate commercial, customer, data and technical priorities into scope, workback schedules, structured requirements, implementation plans, sprint priorities, decision logs, acceptance criteria, test scenarios and controlled launch plans.
- Introduced structured intake, prioritization, RAID and change control that reduced late-stage scope changes by 30%; built UAT and release controls that shortened UAT-to-launch cycles by 20%.
- Manage scoping, LOE estimation, forecasting, budget tracking, burn management, resource allocation, SOW support and change requests; improved monthly forecast accuracy to within 5% of actual delivery effort.
- Orchestrate handoffs across client stakeholders, strategy, UX/design, solution architecture, engineering/development, data, QA, analytics, operations and support, with clear ownership, dependencies and acceptance criteria.
- Frame technical recommendations around business outcome, source of truth, identity, latency, scale, consent, failure behavior and operating ownership; communicate the recommendation and trade-offs to technical and non-technical stakeholders.
- Stay involved after release through stakeholder briefings, release documentation, training, monitoring and handoff support; use customer feedback, support issues, adoption signals and platform data to prioritize optimization and broader rollout.

EnsembleIQ - Digital Operations Manager

Jan 2021 - Sep 2021 | Toronto, Canada

- Led 30+ integrated digital program and campaign launches annually across paid social, Google Ads, sponsored content, lifecycle email, web and landing-page experiences for retail, CPG and B2B clients.
- Managed discovery, scope, timelines, budgets, resources, requirements, tracking, QA, risks, launches and reporting across sales, editorial, media, creative, analytics and web teams.
- Built repeatable campaign-planning, asset-tracking and performance-reporting processes that reduced reporting turnaround time by 25%.

101 Mobility - Customer Success Manager

2019 - 2020 | North York, Canada

- Owned CRM operations, customer analytics, service-performance reporting and process-improvement initiatives supporting acquisition, retention, local-market growth and customer experience.
- Consolidated referral, lead, service, revenue and customer-performance data into reporting frameworks that reduced manual analysis by 30% and helped leaders identify underperforming channels faster.

Jobs Canada Fair - Project Team Lead, Marketing & Events

Aug 2018 - Jul 2019 | Toronto / national

- Led an eight-person cross-functional team across six provinces, coordinating digital campaigns, email, partner communications, event logistics and on-site activation.
- Owned strategy and execution across 125+ targeted email campaigns; contributed to a 10% increase in customer retention and 15% increase in new-customer acquisition.

Additional experience: Primerica - Marketing & Financial Services Representative (2019-2020).

CORE CAPABILITIES

Project / program delivery

Discovery & requirements | Roadmaps & implementation planning | Scope, schedule, budget & resources | RAID, dependencies & change control | Cross-functional handoffs | UAT & launch readiness | Client enablement, adoption & rollout | Executive reporting & governance

CRM / data / MarTech

Lifecycle journeys & automation | Segmentation, targeting & personalization | Consent & preference management | SQL-based audience validation | REST APIs & JSON | Customer-data & identity workflows | Monitoring, optimization & scale

PLATFORMS & TOOLS

Salesforce Marketing Cloud | Marketing Cloud Next | Salesforce Data 360 | Braze | Journey Builder | Email Studio | Wrike | Jira | Asana | Confluence | Miro | Google Analytics 4 | Looker Studio | Excel

SELECTED PORTFOLIO EVIDENCE

The 80% Drop - Cross-system diagnosis across web forms, Salesforce capture, consent, identity and attribution; explicit engineering handoffs and end-to-end proof.

Making 200 Million Messages Boring - Enterprise operating model for 20+ concurrent workstreams and 200M+ annual sends, with launch governance, client adoption, optimization and scale.

The Bill That Couldn't Go Missing - File-driven lifecycle incident used to improve observability, exception handling and operational ownership across systems.

Waypoint Architecture Lab - Self-directed technical exercise covering identity vs data authority, SDK/REST/warehouse choices, real-time vs batch, scale, failure modes and rollout.
