Professional Summary

Client-facing Technical Project Manager with 7+ years of experience delivering enterprise CRM, lifecycle marketing, customer-data, MarTech, and integrated digital programs. Lead complex initiatives from discovery through implementation, launch, client adoption, and optimization across scope, budgets, resourcing, risks, dependencies, QA, stakeholder alignment, and executive reporting.

Experience spans Salesforce Marketing Cloud, Marketing Cloud Next, Salesforce Data 360, Braze, SQL-based audience validation, customer-data workflows, consent and preference management, and API-driven automation. Strong at turning ambiguous business, customer, data, and technical requirements into clear recommendations, delivery plans, launch decisions, and practical next steps for clients, architects, developers, QA, analytics, and operations teams.

Core Competencies

- Technical Project & Program Delivery
- Technical Discovery & Architecture Trade-offs
- Requirements Gathering & Stakeholder Alignment
- Cross-functional Handoffs & Ownership
- Scope, Timeline, Budget & Resource Management
- Risk, Dependency & Escalation Management
- UAT, Launch Readiness & Release Governance
- CRM, CDP, Customer Data & MarTech Programs
- Product Roadmaps, Prioritization & Delivery Planning
- Lifecycle Marketing & Customer Journey Planning
- Brand, Campaign & Go-to-Market Support
- Client Adoption, Optimization & Scale
- Executive Communication & Delivery Governance
- Performance Reporting, Testing & Optimization

Professional Experience

Account Manager (Technical Project Delivery Lead, CRM & MarTech) | Vigorate

Toronto, Ontario | September 2021 to Present

- Own end-to-end delivery across enterprise CRM, lifecycle marketing, customer-data, and MarTech engagements, translating commercial priorities into scope, delivery plans, workback schedules, technical requirements, QA plans, launch decisions, and post-launch improvement actions.
- Manage a portfolio of 20+ concurrent client workstreams each quarter across Salesforce Marketing Cloud, Marketing Cloud Next, Salesforce Data 360, Braze, and connected data environments, balancing urgent production releases with roadmap, optimization, and platform-improvement work.
- Lead lifecycle and customer-engagement programs supporting 200M+ annual SMS/MMS and email sends, coordinating segmentation, targeting, journey logic, automation requirements, data validation, QA, reporting, and performance optimization.
- Frame technical recommendations around the business outcome and the constraints that can change the answer, including data authority, identity, latency, scale, consent, failure behavior, and operating ownership; translate the recommendation and trade-offs for client, product, architecture, and engineering stakeholders.
- Introduced structured intake, prioritization, RAID, and change-control practices that reduced late-stage scope changes by 30%, improved stakeholder visibility, and increased launch-readiness confidence across high-volume programs.
- Built delivery controls for requirements, acceptance criteria, test scenarios, decision logs, and release checklists, reducing avoidable production defects and shortening UAT-to-launch cycles by 20%.
- Own commercial health across retainer and project-based engagements, including scoping, level-of-effort estimation, forecasting, budget tracking, burn management, resource allocation, SOW support, and change requests; improved monthly forecast accuracy to within 5% of actual delivery effort through clearer capacity planning and earlier escalation of resourcing and scope risks.
- Orchestrate handoffs across client stakeholders, strategy, product, UX/design, solution architecture, engineering/development, data, QA, analytics, operations, and support, keeping requirements, dependencies, acceptance criteria, ownership, and decision context clear through implementation and launch.
- Lead technical and operational readiness across customer-data workflows, SQL-based audience validation, consent and preference management, API-driven automation, platform integrations, and production deployment controls.
- Stay involved after release through stakeholder briefings, release documentation, training, and handoff support; use customer feedback, support issues, adoption signals, operational data, and platform analytics to prioritize optimization and determine when proven capabilities are ready for broader rollout.
- Provide executive-level delivery reporting that connects progress, budget, risks, dependencies, customer impact, and decisions required, enabling faster action on at-risk releases and competing priorities.

Digital Operations Manager | EnsembleIQ

Toronto, Ontario | January 2021 to September 2021

- Led integrated digital campaigns across paid social, Google Ads, sponsored content, lifecycle email, and web for retail, CPG, and B2B media clients, supporting acquisition, engagement, advertiser objectives, brand programs, and recurring revenue.
- Managed 30+ multi-channel campaign launches annually from briefing through post-campaign reporting, aligning audience strategy, creative requirements, media pacing, tracking, landing-page requirements, delivery timelines, and stakeholder expectations.
- Built repeatable campaign-planning and performance-reporting processes that reduced reporting turnaround time by 25% and gave advertisers clearer visibility into pacing, engagement, and optimization opportunities.
- Partnered with sales, editorial, media, creative, and web teams to translate advertiser, brand, and go-to-market needs into executable digital programs while protecting deadlines, campaign quality, and client expectations.

Customer Success Manager | 101 Mobility

North York, Ontario | July 2019 to December 2020

- Managed CRM operations, customer analytics, service-performance reporting, and client-delivery processes supporting acquisition, retention, local-market growth, and customer experience.
- Consolidated referral, lead, service, revenue, and customer-performance data into reporting frameworks that reduced manual analysis by 30% and enabled leaders to identify underperforming channels faster.
- Analyzed referral sources, customer trends, pull-through rates, job values, service patterns, and market data to identify opportunities across marketing, pricing, operational performance, and local growth strategy.
- Developed competitive-market insights used to strengthen local positioning, sales messaging, service differentiation, and franchise growth planning.

Marketing & Financial Services Representative | Primerica

North York, Ontario | March 2019 to August 2020

- Developed needs-based financial plans across insurance and investment products, supporting client acquisition, relationship management, financial education, tailored recommendations, and ongoing customer communication in a regulated environment.
- Built a referral-driven prospecting approach that increased repeat conversations, strengthened client follow-up, and contributed to recognition through Primerica's North American incentive program.

Project Team Lead | Jobs Canada Fair

Toronto, Ontario | August 2018 to July 2019

- Led an eight-person cross-functional team delivering recruitment marketing and event operations across six provinces, coordinating paid media, email marketing, promotional calendars, partner communications, venue logistics, and on-site execution.
- Owned strategy and execution for 125+ targeted email campaigns, increasing customer retention by 10% and new customer acquisition by 15% through audience segmentation, tailored messaging, campaign timing, and ongoing optimization.
- Managed simultaneous regional campaign launches, employer communications, event requirements, creative assets, and time-sensitive operational dependencies across multiple Canadian markets.
- Introduced centralized planning and campaign-tracking practices that improved team visibility, reduced missed handoffs, and supported more consistent regional execution.
